STEEL OF LIFE

FENCE

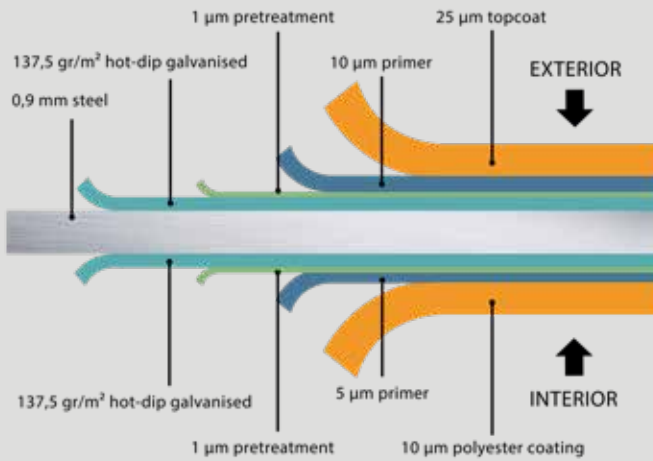

A modern steel fence

We are living with increasing levels of pressure and stress. Often, the only place we can relax is at home. Alone or with our family.

And to be fair, we would rather not be disturbed after a busy day if we are looking for some peace and quiet. Our garden is a little piece of paradise that will always be there. So embrace that blissful place. Embrace it sustainably and with both hands. Embrace it with our Telluria fence.

An elegant solution to guarantee your privacy. The sleek design matches any garden. Whether you have a romantic English garden full of lush flowers, or a sleek garden with trained lime trees and a swimming pond.

This fence will provide the finished detail without taking the attention away from your garden.

STEEL IS A SUSTAINABLE CONSTRUCTION MATERIAL

All ELEGANTO profiles are made of galvanised (hot-dipped) steel. The steel plates have a 275g/m² zinc layer, ensuring an ELEGANTO garden building never rusts.

TELLURIA only uses high-grade steel delivered by European suppliers. These suppliers produce steel using state-of-the-art, efficient processes, from raw material to the finished product.

STRONG AND DURABLE

QUICK AND EASY ASSEMBLY

NO MAINTENANCE

SECURE

CONTEMPORARY LOOK&FEEL

ECOLOGICAL FOOTPRINT

5 PLATES HIGH

mm - Thickness 1.5 mm.

REVOLUTIONARY STEEL CONSTRUCTION SYSTEM

STEEL OF LIFE

TELLURIA is an easy to install steel construction system. The countless benefits of steel mean this system will play a vital role in the future; with its flexibility the system inspires the realisation of people's dream constructions.

ON-SITE PRODUCTION

All TELLURIA components are of European origin, produced at our site in Belgium. Our fully standardised and automated production process is continuously monitored, resulting in premium products. The components and constructions are comprehensively and stringently tested, using only high-grade materials.
